

An Introduction to **Voice Over I.P.** (V.o.I.P.)  
business solutions provided by Voicenet - Solutions Ltd.

Voicenet Solutions is a company set up with the vision of enabling businesses to adopt and utilise cutting edge telecommunication systems. It is our mission to go beyond the connection of telephones, to the delivery of total workforce connectivity.

The communications landscape of today, is defined through the rapid development, and implementation, of new technologies. For many businesses keeping up with, and implementing change, is often more of a headache than continuing to work with existing outdated legacy systems.

Our challenge, and our promise, is to provide our customers with cost and management efficient, business communications services, with minimal change to our clients business working procedures. Our business services don't just offer new telecommunication technology, our solutions offer intelligent business communications.

### Experience and knowledge:

Voicenet Solutions was established to promote VoIP broadband telephony solutions, whether utilising existing PBX's, or pure IP telephony, to take advantage of the rollout of Broadband services throughout the United Kingdom. The Directors of the company have over 25 Years experience within the telecom and communications market. This experience started from the first days of liberalisation, through to the opening up of the market allowing other service providers to compete with the incumbent operators such as BT.

### Evolving telecommunications:

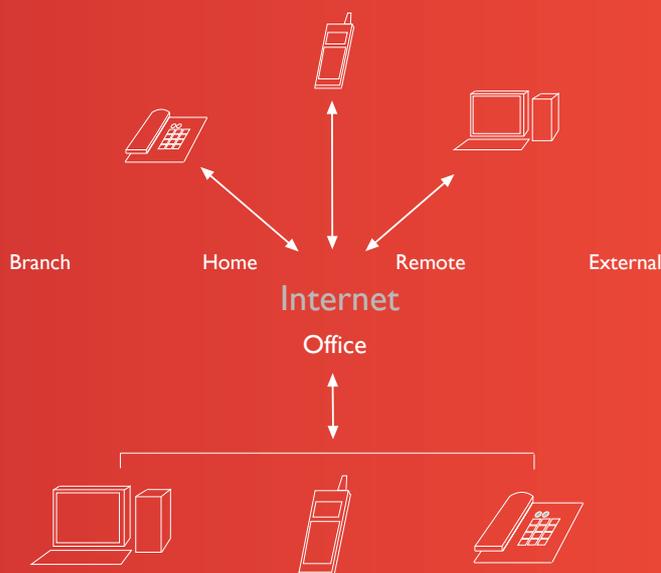

The ability to make telephone calls over the Internet (VoIP) has been available for a number of years, but until the advent of Broadband, has never been a "business to business" product. All that has now changed.

### Voicenet Solutions commitment:

Voicenet Solutions and their business partners are fully committed to the business reality of replacing legacy systems, and traditional lines, with fully featured flexible VoIP business solutions, allowing businesses to operate with maximum efficiency, while incurring minimum cost.

Next-generation, cost-saving telephony, with zero investment. Voice Over I.P. is a revolutionary telephony service, suitable for businesses and residential users alike. By delivering phone calls over a broadband connection, but behaving like a traditional telephone service, it makes expensive PBXs and BT lines redundant. The service also offers free on-net calls and reduced calling rates to national, international and mobile destinations, while giving users the full functionality they would expect from a high range PBX.

#### VoIP overview

## The key Benefits

### Free On-Net Calls

Calls between sites connected to Broadband Telephony are free of charge.

### Reduced Calling Costs to Other Locations

As a licensed UK telco, Inclarity offers greatly reduced national, international and mobile rates.

### Improved Communications

By connecting branches and enabling personal call management, Broadband Telephony improves productivity, ensures that employees work more closely together and that customers are handled more efficiently.

### Zero Investment

There's no need to invest in PBXs, BT lines or any traditional telephony hardware, all of which are made redundant by Broadband Telephony.

### Zero Maintenance

There is no need to dedicate precious resources to costly PBX maintenance, future expansions and upgrades. Upgrades and expansions can be handled remotely at no extra cost to the customer.

### Simplified Administration & Ease of Use

Broadband Telephony's easy-to-use administration tools guarantee reduced operational costs, simplified administration and easy monitoring of usage.
